ABOUT ME

Software Engineer focused on back-end development with Java and the Spring ecosystem, with experience working with SQL databases, RESTful APIs, Docker, and modern development tools. Comfortable building and maintaining server-side applications, handling data processing, and integrating systems through APIs while following good software engineering practices.

EXPERIENCE

Uniplus Conquista

2024-2026

ERP System Administration and API/Data Integration

- Maintained and supported an enterprise ERP system.
- Worked with REST APIs to manage and manipulate application data.
- Performed SQL queries and data analysis to troubleshoot and validate system data.
- Investigated and resolved issues related to data flow and system integrations.
- Provided technical support and collaborated with users to improve system usage.

DEGREE

Technology (Associate) Degree in System Analysis and Development

2024 – UNINTER
